

Driving Positive Change

Corporate Social Responsibility
Annual Report 2024

A 360° Commitment to Supporting Our Local Community

Sipchem recognizes the importance of social responsibility as a vital foundation for sustainable development in our communities. From this perspective, we launched the "Sipchem Cares" program, which represents our commitment to meaningful community engagement and the promotion of charity and volunteerism.

Through this program, we implement strategic initiatives that deliver measurable impact by supporting skill-building, empowering individuals, and driving long-term sustainable development. Each initiative is designed to enhance social cohesion, foster inclusive opportunities, and contribute to national development goals.

We remain committed to continuously evolving our approach, ensuring our efforts generate significant social value and contribute to both community advancement and economic resilience.

Innovative Youth Incubation Program

Sipchem launched a dedicated program to support, incubate, and empower young initiative owners by designing an integrated experience for developing and marketing professional impact-driven products. The program also fosters an interactive environment for skill development and relationship building, in partnership with Shabab Mujtamaei Waqf Company.
